

Society of Radiopharmaceutical Sciences

1st Virtual Meeting in Latin America

22nd - 24th of September 2021

Free of charge

Main Themes:

- Status and perspectives for radiopharmacy in Latin America: the role of SRS and IAEA in its development.
- Basis for development and evaluation of new radiopharmaceuticals.
- Challenges and opportunities for radiometal and ^{11}C production and labelling.
- Molecular targets for the development of radiopharmaceuticals for oncology and neurology.
- Oral scientific presentations of submitted abstracts.

In the scientific session, students are encouraged to present in their language of preference (English, Portuguese or Spanish).
